To Those Concerned:

It's a pleasure to write this letter recommending Westchester Air Duct Cleaning. Manny was nothing short of amazing, solving a severe and potentially dangerous problem with our dryer vent that had gone essentially ignored by another service that had been doing our vent cleaning for years.

We had terrible trouble with our dryer not working, taking forever to dry clothes, and the appliance service we'd trusted for a couple of decades could not figure out how to solve it. The answer seemed obvious, that there was a problem with the vent, yet two different professionals could not find that problem.

That's when we called Westchester Air Duct Cleaning. Manny was prompt, thorough, and conscientious—and he discovered that our dryer vent was lined with a thick layer of compressed lint that had been pushed into the walls of the vent for years, going unnoticed by the other folks who'd cleaned the vent because they simply didn't examine the vent the way Manny did. The compressed lint was gradually closing off the vent, which was both stressing our dryer unnecessarily and also creating a fire hazard.

Manny removed the layers of compressed lint and restored the vent to what it should have been all this time—and our dryer worked again! We've saved hours of work on laundry, we've saved money on wasted energy, and we've prolonged the life of our dryer, as well as eliminated a fire hazard, all thanks to Westchester Air Duct Cleaning.

I'm happy to recommend Manny and Westchester Air Duct Cleaning strongly and enthusiastically. You'll be impressed and delighted. Manny's a great professional, and he's nice too. A-plus all around!

Sincerely,

Nan Hayworth, M.D.
